

SEAPC has joined with the Kingdom of Cambodia and New Hope for Orphans to form SEAPC/Cambodia, a national Christian organization. From this base, we are responding to the invitation of the King of Cambodia to establish 25 model schools in rural parts of the kingdom.

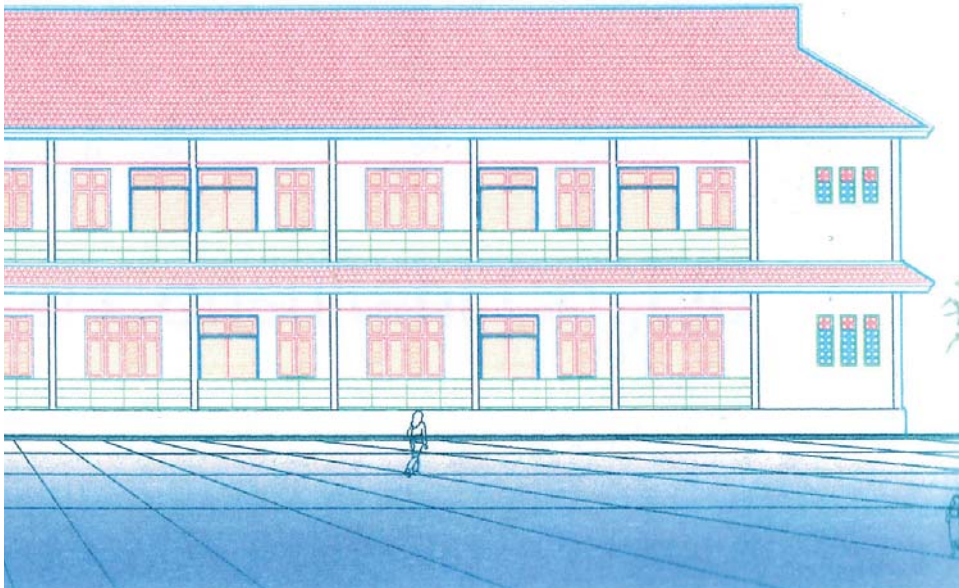

The project is being overseen by Pastor Sinai Phouek. The partnership of SEAPC/USA, SEAPC/Singapore, SEAPC/Malaysia, and SEAPC/Cambodia are making the dream of quality Christian education a reality for thousands of young people. Trade schools in textiles, hotel and business management, agriculture, computer science and building trades have already begun as SEAPC announces the Cambodian Christian School Network.

A project of South East Asia Prayer Center.

Cambodia Christian School Network

Changing Lives Through Education

School Development Process

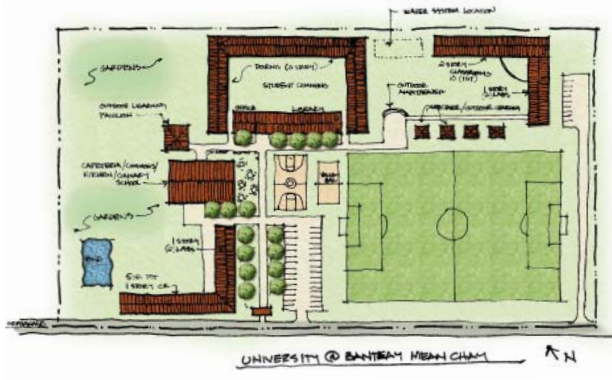

Concept

First, an idea is developed and drawn. Pastor Im Chron made this drawing of the future school in Kampong Cham in Cambodian soil at the site.

The concept is taken to architect Rob Pillar from Burt Hill Architecture.

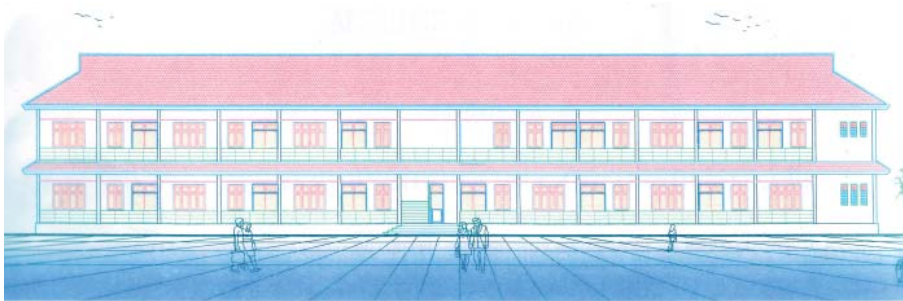

Rough Draft

After extensive research combining Burt Hill and local architects, the following building plans were developed.

These buildings combine optimal educational opportunity with environmental and cultural considerations.

Design

This is a design plan for classrooms/dormitories near Banteay Meanteay Orphanage. An existing structure was found similar to this design and will be used (*opposite page, bottom picture*).

Implementation

The Rongko preschool in Banteay Meanchey was completed by SEAPC in July 2006.

These dormitories located in Banteay Meanchey, 9/2005 (left), and Koh Kong, 9/2004 (right), were built by SEAPC/Cambodia and are the layout being used for some of the classroom buildings.

This building has been identified as the exact layout to be used for the various college dormitories/classrooms.
